PUBLIC WORKS COMMITTEE MEETING Trash/Water/Sewer (Kaiser/Blaies/Heap/Meehling) Wednesday, April 15, 2020 at 5:45 p.m.

The Public Works Committee Meeting was called to order at 5:49 p.m. on Wednesday, April 15, 2020, by Chairman Bob Kaiser via the Zoom app. Members present via Zoom were Chairman Bob Kaiser, Trustee Mike Blaies, Trustee Mike Heap, Trustee Lisa Meehling, Mayor Seth Speiser, Village Clerk Jerry Menard (absent), Trustee Denise Albers, Trustee Ray Matchett, Public Works Director John Tolan, Water/Sewer Department Leader Gregg Blomenkamp, Crew Worker Trevor Breitwieser, Village Attorney Fred Keck, Village Administrator Tony Funderburg and Office Manager Julie Polson. Guests present: Dan Wiskamp and Janet Baechle (6:12 p.m.).

A. OLD BUSINESS:

1. Approval of March 11, 2020 minutes: Trustee Mike Blaies motioned to approve the March 11, 2020 minutes and Trustee Mike Heap seconded the motion. All voting yea, the motion carried.
2. New Sewer Plant/Sewer Loan: Public Works Director John Tolan has had a couple of meetings with Burns & McDonnell to finalize the design. They have reduced the size of the admin building. He also also met with Ally reviewing the CMOM storm water overflows. We received approval to be on the funding track for the low interest loan. The current timetable would be to go out to bid in July and construction would start in October. We still need to have a meeeting to discuss the projected cost and rate structure.
3. Sewer issues: John advised we had a couple sewer issues this past month. Tim Kunklemann had a slow drain on his sewer. John is going to clean and televise that area as well as around the grade school, behind Market Place and Don Gass' property at 2 S. Cherry.

Mayor Speiser brought up Barb Winterbauer's sewer issues, and John explained her water line was hit and a lot of mud got into her line. He had her meter flushed out and was still experiencing problems. John agreed with the Mayor that we need to work something out with her. Tony is working on it.

4. FSH Minutes: John said they tried to set up a meeting on Zoom, but they didn't have a quorum or a meeting.
5. Old Freeburg Road Water Line: John received an email TWM advising the railroad denied the permit. Chris will correct the items and resubmit it to them. They will not charge us another permit fee.
6. Water System Study: John said he met virtually with TWM, but he needs to have a face-to-face meeting with them to understand what they are trying to do. They are presenting phases on replacing the water mains in town, with the first one being around the schools.

Regarding Edison Estates, Zoning Administrator Matt Trout said we have received TWM's review, and that has been sent to Tim at Rhutasel. Tim resubmitted the changes late last week with the revised drainage and answered all the questions we and TWM had. Tim is working with IEPA on some clarifications needed for the water permit. Matt said that John did push to have Rhutasel and/or the developer to get a water flow test done. We asked for an independent test to be done since it is going to be very close to the 1,000 gallons a minute at 20 psi. John said this test has been done with the other developments in Freeburg. We want that done before the infrastructure is put into place. Mark White approved having that test done. Both Matt and John feel comfortable moving this forward to the Combined Planning/Zoning Board. Matt advised Mark does have equipment out there and has the EPA permit to grade the dirt. The committee was okay with this going back to the Combined Planning/Zoning Board. Matt will keep this board apprised of any updates.

B. NEW BUSINESS: John advised we had a leak on the East tower where the bowl and standpipe meet. TriKote came out, shut down the tower, welded the leak and disinfected the water. Today we collected the first of two samples, and we will be able to open back up after the test comes back. We were able to isolate it and no boil order was needed. John stated the TTHMS and HAAs sampling back for February with good results. Gregg is working on the cross connection control surveys, nitrification action plan, and making corrections on the GIS system. John also said that he was able to get more protective gear. We are seeing reports of it showing up in the sewer, so our guys are very careful wearing stuff the PPE and disinfecting everything.

C. GENERAL CONCERNS: None

D. PUBLIC PARTICIPATION: None.

E. ADJOURN: *Trustee Mike Blaies motioned to adjourn the meeting at 6:18 p.m. and Trustee Mike Heap seconded the motion. All voting yea, the motion carried.*

Hi Tony, I am still waiting to hear back from operations on when they'd be able to start and what service day it would be collected on, etc., but I can at least tell you the rate and specifics of the program for the time being.

Let me know if you have any questions.

Thanks!

Freeburg, Illinois 62243

Dear Mr. Funderburg,

On behalf of the entire St Louis area team at Waste Management, we sincerely thank you for your business, and the opportunity to provide you with a quote for curbside single stream recycling.

Our quote is as follows:

- **Every-Other-Week Curbside Recycling on a Non-Mandatory Subscription Basis**
- **Cost: \$15.00 Per Month, Per Home, Direct Billed to the Resident.**
- **Rates would be reviewed annually to account for changes to global recycling market**
- **Our quotes include WM providing each resident with a brand new 96-gallon recycling cart for use in the curbside collection program.**

As you may notice, the rate quoted above is significantly higher than in previous years, and the reason for that is due to a major change in the global recycling market, specifically in the 3rd party consumers of recycling commodities in China and Southeast Asia. Below is a brief summary of this activity:

- 2017: Over 25% of the world's recyclables were imported by China, including more than 50% of paper and plastic materials.
- China's new import policies banning certain materials and limiting contamination have global impacts on recycling communities across the USA.
- Operation Blue Sky = screening effort at China's ports to inspect loads and enforce material bans and the strict 0.5% contamination limit.
- Situation not likely to improve, as China appears to be on path to eliminate all imports of post-consumer recyclables by the end of 2021.
- The reduction of China's markets resulted in oversupply of commodities and depressed commodity pricing. Supply is too high and the demand is too low.
- The result of this change in the recycling market can be felt here in the St Louis region as well, as processing costs have drastically increased since China rolled out their change in policy regarding import of recyclables.

Thank you again for the opportunity to provide you with a quote and a little backstory on the global recycling market. Please let me know if you have any questions about the information I have presented here. I look forward to hearing more from you, and look forward to our continued partnership.

Sincerely,

A handwritten signature in black ink, appearing to read 'Paul Bickford'. The signature is stylized and somewhat cursive.

Subject: Waste Management

Good Morning Sir,

You had asked about waste limits for the curbside trash program. Looks like Dan's old notes have it as the following:

- 5 – 32 gallon personal cans
- OR 10 bags of trash
- OR 1 – 96 gallon WM trash cart

The 96 gallon rolling trash carts are always available for rental from WM for \$3.75 per month. If residents would like to sign up for toter rental, they can do so by calling our customer service team at 1-800-964-8988. Residents would need to mention that they reside in the Village of Freeburg, IL. Looks like there's a few people out there now that have the carts.

Also, as it relates to survivability of COVID-19 on surfaces, the guidance we have received from the CDC and the National Institute of Health is that the virus can survive on cardboard for up to 24 hours, stainless steel/metal surfaces for 2 days, and plastic for up to 3 days. Obviously there are a lot of factors that go into the exact survivability on the surfaces such as environment and UV exposure. The overall guidance that we received was to ensure employees are using PPE when touching any and all refuse and waste containers. Our employees are using gloves, eye protection, and respirators as needed when handling waste materials.
