## NOTICE

### **MEETING OF THE PUBLIC WORKS COMMITTEE Trash/Water/Sewer (Mattern/Speiser/Miller)**

A Public Works Committee Meeting of the Village of Freeburg will be held at the Municipal Center, Executive Board Room, on **Wednesday, May 26, 2010, at 4:30 p.m.**

### **PUBLIC WORKS COMMITTEE MEETING AGENDA**

- I. Items To Be Reviewed
  - A. Old Business
    1. Approval of April 21, 2010 minutes
    2. SAVE Site water situation
    3. Sewer Project
    4. Recycling
    5. Sewer backup policy
    6. FSH System Requirements
    7. Dumpster at lot on White Street
    8. Towers Fire Apparatus/Fire Hydrants
  - B. New Business
    1. IEPA - Noncompliance Advisory
  - C. General Concerns
  - D. Public Participation
  - E. Adjourn

At said Committee Meeting, the Village Board of Trustees may vote on whether or not to hold an Executive Session to discuss potential litigation, [5 ILCS, 120/2 - (c)(11)] ; the selection of a person to fill a public office [5 ILCS, 120/2 - (c) (3)] personnel [5 ILCS, 120/2 - (c) (1) a.]; or real estate transactions [5 ILCS, 120/2 - (c) (5)].

**PUBLIC WORKS COMMITTEE MEETING**

Trash/Water/Sewer

(Mattern/Miller/Speiser)

Wednesday, May 26, 2010 at 4:30 p.m.

The Public Works Committee Meeting was called to order at 4:34 p.m. on Wednesday, May 26, 2010, by Chairman Charlie Mattern. Members present were Chairman Charlie Mattern, Trustee Tony Miller, Trustee Seth Speiser, Village Administrator Dennis Herzing, Assistant Public Works Director John Tolan and Office Manager Julie Polson. Guest present: Janet Baechle.

**A. OLD BUSINESS:**

1. Approval of April 21, 2010 minutes: *Trustee Tony Miller motioned to approve the April 21, 2010 minutes and Trustee Seth Speiser seconded the motion.* All voting aye, the motion carried.
2. SAVE Site Water Situation: The bids were in the packet and Korte-Luitjohan came in at the lowest bid of \$102,997. Dennis said they put the whole project in the bid to see what the prices looked like. The committee discussed having our public works employees doing some of the work themselves such as the service connections, fire hydrants. Dennis talked to Netemeyer about this and Netemeyer suggested if we were going to do some of the work, we should pull out an entire item rather than bits and pieces. John Tolan suggested we take out the fertilizer and seeding. He also said the water lines are really deep and run every which way and agreed we need to take out the service connections. Dennis said we need to get the bid back into the \$65,000 - \$70,000 range and that we need to sit down with Korte-Luitjohan and work it out.

*Trustee Tony Miller motioned to recommend to the full Board that Korte-Luitjohan's bid in the amount of \$102,997 for the Save Road/Lee Hopp Drive Watermain Replacement be accepted and Trustee Seth Speiser seconded the motion.*

3. Sewer Project: The public hearing on the sewer project was held on May 19, 2010. The minutes of the meeting are attached. No public was present.
4. Recycling: Dennis has received the contract for the cardboard dumpsters and said we are trying to figure out the spacing for them. Charlie asked if the dumpsters could be stacked one in front of the other and Dennis will check with the company on that. He also said we are currently recycling about 1.25 tons of paper per week. Janet asked about the battery recycling and Dennis had provided the information to the committee and said it is too expensive. Dennis said another situation that we have to discuss is we have a couple people digging through the dumpsters trying to take certain items out of them. He thinks this is a liability issue that we really don't want to deal with and the committee agreed. Dennis will let them know.

Water/Sewer Committee Meeting

Wednesday, May 26, 2010

Page 1 of 3

5. Sewer backup policy: John gave an update on the backflow preventers that had been installed. Dennis said we are not going to make any changes to the ordinance and the committee confirmed this. Trustee Miller asked about the Dambacher problem and John advised it had been scheduled for today but had to be delayed. John and Dennis met with Kohnen Concrete and have revised the plan that was initially decided upon. The location of the lift station will be moved to the south of Shampoodles and John is looking to do the project the second week of July. He wants it to be dry since we will be going deep and it needs to be shored up. Dennis commented Kohnen was happy with the revised plan.
6. FSH System Requirements: The EPA permit has been received and John said we can move on it now.
7. Dumpster at lot on White Street: Dennis said we did receive a \$50,000 grant that can be spent on infrastructure. We have been talking about putting a shed on this property and could use grant money to do that. Dennis advised Corby said the electric department could possibly add money to that from the electric fund to get the shed that we need. John said we need to get our trucks and equipment inside. John also said he thinks the old sewer plant would be a perfect place for the dumpster as it is fenced in and could be locked up, and you could use the drying beds for the leaves. Seth said a 40 x 80 pole barn would cost around \$30,000. Dennis told the committee a decision on the grant needs to be made relatively soon. Item will be moved to Street Committee.
8. Towers Fire Apparatus/Fire Hydrants: Dennis said he and Julie researched this and couldn't find the old agreement. However, they did locate a fire hydrant use application which is included in the packet. Dennis thought we could send this to Towers with a letter advising we believe this has been done in the past and to have them fill out the application and return it to us. Tony suggested we have something in the application that states it should be sent in each time a hydrant is used and also that the Village be notified in advance. Charlie asked if we could give Towers a radio read meter. It was agreed that this is probably not economically feasible. Julie will get the application revised.

**B. NEW BUSINESS:**

1. IEPA - Noncompliance Advisory: John said he will respond to the notice. He said the inspection went well. He will be conducting a cross-connection survey and using templates from IRWA. Davinroy will help him with it. John said there are some structural problems with the east tower. The insides of the towers are in fairly good shape. The inspection reports from the east and west towers were briefly reviewed. It will cost \$13,000 in repairs the east tower, \$2,500 in interior coating repairs; \$10,000 in repairs to the west tower and \$2,500 in interior spot repairs, \$2,500 to fix the ladder totaling about \$30,500. The committee talked about possibly using the \$50,000 to cover those repairs.

Tony brought up a concern he received from a resident about dumpsters being enclosed and asked if we had that in ordinance form. Dennis said it is required by ordinance to enclose trash bins in the B-2 zoning district. We will have Phil Borger look at the businesses in the B-2 district to see who is complying with the code. A letter will be sent to those who are not in compliance.

**C. GENERAL CONCERNS:** Dennis said we have a landlord that is trying to force the Village to turn off utilities on an account that is current in order to get the tenant evicted. Attorney Wigginton advised the landlord cannot use the Village in this manner. Jane has always told the landlord that we will not turn utilities off if an account is current. Dennis said it is also our policy that if there is an outstanding final bill, we will not turn utilities on until it has been paid.

Tony brought up the recreation fee and Dennis said Roger Huebner of IML said we cannot do that. The pool would have to be funded by a bond referendum.

Dennis said we have had some employees ask about the free pool pass to village employees. John commented when he first started with the village, the employees received a free pass. The committee briefly discussed this but did not make a decision.

**D. PUBLIC PARTICIPATION:** Janet wanted to know if we would make the recycling station one-way and Dennis said no, it is working fine as it is.

**E. ADJOURN:** *Trustee Tony Miller motioned to adjourn at 6:00 p.m. and Trustee Seth Speiser seconded the motion. All voting aye, motion carried.*

## PUBLIC WORKS COMMITTEE MEETING Trash/Water/Sewer (Mattern/Miller/Speiser) Wednesday, April 21, 2010 at 5:30 p.m.

The Public Works Committee Meeting was called to order at 5:30 p.m. on Wednesday, April 21, 2010, by Chairman Charlie Mattern. Members present were Chairman Charlie Mattern, Trustee Tony Miller, Trustee Seth Speiser, Village Administrator Dennis Herzing, Public Works Director Ron Dintelmann, Assistant Public Works Director John Tolan and Office Manager Julie Polson. Guests present: Mike Blaies and Janet Baechle.

### A. OLD BUSINESS:

1. Approval of March 17, 2010 minutes: *Trustee Tony Miller motioned to approve the March 17, 2010 minutes and Trustee Seth Speiser seconded the motion. All voting aye, the motion carried.*
2. SAVE Site Water Situation: The bid package was approved by IGD and the bids are due on May 14th at 2:00 p.m.
3. Sewer Project: Dennis said SIMAPC sent a letter stating the project was outside the Freeburg's Facilities Planning Area. Dennis researched the issue and found a letter from SIMAPC approving our FPA in 2006 and provided that information to Rhutasel. Once SIMAPC received that information, they sent a letter approving the project. Dennis said we have pretty much all of the sign offs for the project. He advised the committee EPA will not fund the force main to the Helm's property. He has set up a meeting on 4/23/10 with Larry Rhutasel, himself and the Helms to see if we can have them accept an agreement where we won't build the line until they need it. We have a commitment to Parrish but Dennis stated Herschel is more concerned with getting sewer to his business rather than his home. As of now, the proposed sewer line ends at Dollar General.
4. Groundwater ordinance: Dennis has heard nothing. Chairman Mattern requested the item be taken off the agenda.
5. Recycling: Dennis talked about getting a dumpster specifically for cardboard which would free up space in the 20-yard dumpsters. It would cost \$15 per load to have the dumpster emptied.
6. Sewer backup policy: John advised Gary Towers and Webers have check valves installed and are done. Weather permitting, they will work on Dambachers on Tuesday, 4/27. John said they televised on Monday and found several problem areas, i.e. Lobasco, Rudy, St. Clair & Phillips, Saturn Terrace all had roots. John also told the committee there was a sewer backup on Tuesday, 4/20 at Rhutasel's old apartments. They had a check valve so there was minimal backup. John said they did find a line full of rock about halfway down Walnut. Dennis said we have

Water/Sewer Committee Meeting  
Wednesday, April 21, 2010  
Page 1 of 3

been aware of a huge leak somewhere and may have stumbled upon it. he would like to televise the line to see if this might be part of that leak.

7. Grease trap problems: Item can be taken off the agenda.
8. FSH System Requirements: Ron said we are waiting on the permit.
9. Spring Clean-up: Ron said we had the usual problems with the dumpsters not being emptied. Next year, he would like to clean and rock the lot that was purchased next to the old power plant and have a 40-yard dumpster there. It could be used for clean up days or any other project, i.e. leaves/limbs. He will have more information for the next meeting.
10. Bruce Pfannebecker's Road: Item can be taken off the agenda.
11. Penalty on utility bills: We will keep with current policy. Item can be taken off the agenda.
12. Mobile Home Park Master Meters: *Trustee Tony Miller motioned to recommend the Ordinance revising the mobile home park owner excess water consumption percentage from 4% to 8% and Trustee Seth Speiser seconded the motion. All voting aye, the motion carried.*

Dennis told the committee F.X. Heiligenstein called the Village regarding the complaints from Povolich about the standing water on his property. Assistant Public Works Director John Tolan confirmed that Chad had installed a new meter and check valve for us. There is no leak and Povolich's property has dried up and there is no water on his property.

Dennis said Larry Rhutasel called about Cindy Funk's request to hook onto our sewer and told Dennis he thinks there may be easement problems and suggested that we might be able to run a Village line out to the highway. John told the committee he met with Cindy and told her she would have to talk to the nursing home about them granting her an easement. Dennis commented she may not be happy with the cost of the survey and easement.

John told the committee the east water tower is going to be cleaned and inspected next week. Tony asked about the prices we charge for the bulk water at the old power plant and said we didn't change those when we raised the water rates. Ron advised the current rates are 50 gallons - 25¢, 500 gallons - \$2.50 and 1,000 gallons - \$5.00. The committee agreed to double the rates effective May 1, 2010.

## **B. NEW BUSINESS:**

1. Towers Fire Apparatus/Fire Hydrants: Ron said about a week ago, one of the employees saw Towers filling one of their fire trucks out of a hydrant on Main Street. He said years ago, we had an agreement in place where they paid an annual fee to do this. He said it takes approximately 2,000 gallons to fill up a fire truck. Dennis will check the file and we what we can find and then send them a letter.

**C. GENERAL CONCERNS:** Tony said a transformer on Dogwood is leaking. Ron said the guys will be out working on it on Tuesday, 4/27. Julie will notify the affected homeowners through the Emergency Contact system.

**D. PUBLIC PARTICIPATION:** Janet wondered why the power went out a while back and Dennis advised it was due to Ameren.

**E. ADJOURN:** *Trustee Tony Miller motioned to adjourn at 6:08 p.m. and Trustee Seth Speiser seconded the motion. All voting aye, motion carried.*

Julie Polson  
Office Manager

**VILLAGE OF FREEBURG – WASTEWATER COLLECTION AND TREATMENT SYSTEM  
IMPROVEMENTS  
IEPA #L173647  
PUBLIC HEARING MINUTES**

A public hearing was held at the Freeburg Village Hall on May 19, 2010 at 5:00 p.m. to discuss its intentions to complete wastewater collection and treatment system improvements and to provide the public with the opportunity to present comments. Notes from the meeting are as follows:

The meeting was opened at 5:00 p.m. by Tim Pruett of Rhutasel and Associates, Inc., the engineer for the project, by discussing the following points:

**WHY DO WE NEED THE PROJECT?**

The growth that the Village of Freeburg has had in recent years has resulted in the need for the Village to plan for future needs and to make necessary improvements to the existing wastewater collection and treatment system. The Facilities Planning Study addressed long term system improvements and expansion needs, as well as improvements that are needed to meet present and short term needs. The present and short term needs have been identified as Phase I, and are to be addressed by this project.

**WHAT ARE THE PROPOSED IMPROVEMENTS?**

The proposed Phase I improvements include the following projects:

- 1) An 18 inch trunk sewer running northeast from its starting point at an existing trunk sewer on Kessler Road and terminating on the west side of Route 13/15 across the highway from the Dairy Queen property. This line will serve as a relief sewer which will allow the diversion of a portion of the existing flow from the northern portion of the community to the new sewer line which will help relieve overloading conditions in the existing system. This line will also be part of the long term plan to provide sanitary sewers to areas to the north.
- 2) The Deerfield sewer extension will intercept wastewater flow from the Deerfield Mobile Home Park and direct it to the new 18 inch trunk sewer described in paragraph 1. The Facility Plan indicated this would be a gravity sewer; however, it has since been determined that due to geographic and physical restrictions resulting from existing utilities, this line will be designed as a lift station and force main discharging to the afore described trunk sewer. It is not believed that this will significantly affect the estimated cost of this portion of the project and will result in very little additional O & M cost.
- 3) Improvements and upgrades will be made to the existing lift stations located on Pitts Street and at the swimming pool. Both of these lift stations are nearly 40 years old and are in need of pump and control panel upgrades as well as the addition of piping to allow for bypass pumping in the case of a power outage.
- 4) Another portion of the project will provide an 8 inch gravity sewer to serve several homes on Apple Street and West Street. The need for this improvement has been recognized for many years and the new sewer line will allow the homes to connect to the municipal sewer system and eliminate existing septic tank and/or aeration systems.
- 5) The east wastewater treatment facility is in need of lagoon sludge removal to restore its initial treatment capacity. Accumulations of sludge which have resulted from many years of operation need to be removed and the banks of the lagoons will have rip rap placed on them to protect them from further wave action damage. Additionally, new walkways will be provided for the concrete transfer and discharge structures in the lagoon to replace unsafe existing and deteriorated walkways.
- 6) A 6 inch force main will be run from the new trunk sewer described in paragraph 1 north along Route 13/15 a distance of approximately 2 miles to property previously annexed to the Village of Freeburg. This portion of the project will not be eligible for IEPA loan funds and will be funded by the Village from other sources.

**HOW MUCH WILL THE PROJECT COST?**

Estimate of Probable Total Project Cost = \$1,486,300. The IEPA loan eligible portion of the project is \$1,039,650.

**FUNDING THE PROJECT?**

The Village proposes to finance the project through a low interest loan from the Illinois Environmental Protection Agency – Water Pollution Control Loan Program. Portions of the project that are not eligible for loan funds will be paid by the Village from funds on hand or borrowed from other sources.

**PROJECT SCHEDULE?**

The Village has applied for a IEPA low interest loan, which is expected to be approved in the summer of 2010. When the Village receives the loan, construction of the new facilities is expected to begin in the fall of 2010, and to be completed in 2011.

Mr. Pruett opened the floor for questions or comments regarding the information presented.

Having no further questions or comments from the attendees, the public hearing was adjourned at 5:10 p.m.

Hi Jane,

Thank you for your inquiry!

I have attached information on the iRecycle Kits we talked about.  
The all-inclusive price provides the Container + Shipping + Recycling for the one price.

Let me know if you have questions or need anything else!

Thank you,

Susan McGeorge

**iRecycle Kit** The iRecycle Kit from Battery Solutions makes it easy for everyone—from households to corporations—to environmentally and economically recycle spent dry-cell batteries.

Each iRecycle Kit includes everything you need to recycle your batteries and handheld electronics. You simply collect all dry-cell battery types and hand-held electronics together—without separating—and mail them to us. We do the sorting, logistics, shipping, receiving, and recycling.

This is our no-hassle solution to helping you help ensure batteries and electronics are recycled properly and easily.

### Features

- ✓ UN-Approved Collection Containers
- ✓ EPA Approved Recycling of All Materials
- ✓ Certificate of Recycling by Request
- ✓ Online Pickup Request
- ✓ Prepaid Shipping Included

### Collection Containers

iRecycle Kits are available in four different collection containers types and sizes to meet a wide variety customer needs . There is a small collection box for residential and small business customers and for larger customers there is a medium-sized box that is perfect for countertop placement and 35 lb. capacity and 55 lb. capacity pails.

### How it Works

1. Purchase the size of recycling kit that's right for you.
2. Receive your recycling kit in the mail.
3. Fill the kit with all types of dry-cell batteries and handheld electronics.
4. Once your kit is filled, ship it prepaid to our recycling center.
5. If requested, a Certificate of Recycling is sent to you.

Option 1

### Materials Accepted

The iRecycle Kit accepts all-types of dry-cell batteries, both rechargeables and non-rechargeables. These include AA, AAA, C-cell, D-cell, 9-volt and button cells sizes as well as all other sizes and all chemistry types, including but not limited to all types and sizes of cellphone, laptop, power tool, camera and other dry-cell battery packs. In addition, small handheld electronics such as cell phones, pagers, PDAs, iPods and other electronics are accepted in the same containers. You are required to tape the metal terminals on all batteries or place them in individual plastic bags before placing them in the recycling container.

### Pricing and Availability

The iRecycle Kit is designed to be easy with a single all-inclusive price for each of the four available collection containers. iRecycle Kits are sold prepaid with payment required at time of purchase. Volume discounts are provided for customers who are buying 25 or more kits at one time.

Continental U.S. use only. Not available in Alaska, Hawaii and Puerto Rico.

Kit	Description	SKU	Standard Price	Qty of 25 or More	Qty of 50 or More	Qty of 100 or More

## Acknowledgement of Partnership

To insure success of this recycling program for the hosting location and Abitibi Bowater, a mutual partnership must be maintained by both parties. Following is an acknowledgement of responsibilities of both parties:

From Abitibi Bowater	From the Hosting Location
<ul style="list-style-type: none"> <li>• Manage Collection of Materials</li> <li>• Professional Service</li> <li>• Support from Local Representatives</li> <li>• Additional bins will be delivered as volume dictates.</li> </ul>	<ul style="list-style-type: none"> <li>• Actively participate by recycling cardboard, plastics, metals, paper, aluminum cans, and phonebooks.</li> <li>• Provide an accessible bin location</li> <li>• Additional bins will be accepted as volume dictates.</li> <li>• Keep trash out of EcoRewards bin.</li> </ul>

The program's hosting location recognizes the difficulty in ensuring that the pavement or driving surface is adequate for bearing the weight of our collection vehicles along with any other vehicle unrelated to the Abitibi program utilizing the existing surfaces. Therefore, Abitibi Bowater will not be held liable or responsible for repairing damage as a result of normal wear and tear to pavement, curbing or parking areas resulting from this program.

The EcoRewards Recycling program is provided at cost of \$15 per flip per container. This agreement will officially commence once the container has been placed. If for any reason either party decides this program is not working, 30 days notice is required to stop service. Thank you.

This is a one year contract, renewable for one consecutive year at the renewable date.

At the onset of this agreement your regularly scheduled day will be FRIDAYS.

(It is understood that The Village of Freeburg may only recycle cardboard at the onset of the program)

VILLAGE OF FREEBURG  
14 SOUTHGATE CENTER  
FREEBURG, IL 62243

FIRE HYDRANT USE APPLICATION

Section 52.11 of Freeburg's water system ordinance states:

- A. All hydrants shall be owned and maintained by the Village and used only by the Village, the United States Government or its agencies, the State of Illinois or its agencies and the Fire Protection District with whom the Village has an Intergovernmental Agreement regarding the provision of fire hydrants.
- B. The Village will undertake and maintain fire hydrants located within the Village limits and owned by the Village in good working order as reasonably as possible, however, it shall not be liable and shall not assume any responsibility or liability for the condition of any fire hydrant inside or outside the Village limits, or the pressure or amount of water obtainable therefrom, or any damages, either direct or resultant because of the condition, pressure, or amount of water available from any fire hydrant.
- C. All hydrants installed on the Village's water supply system shall have one (1) four and one-half (4-1/2) inch outlet and two (2) two and one-half (2-1/2) inch outlets; shall utilize National Standard Fire Hose Thread; shall have hydrant valves which open in the counterclockwise direction; shall be color coded in accordance with NFPA (National Fire Protection Association) Standard 291; and shall comply with the provision of the Illinois Fire Hydrant Act (425 ILCS 20).
- D. All public fire hydrants located outside the Village limits and owned by the Village will be maintained in as good working order as reasonably possible, however, the Village shall not be liable and shall not assume any responsibility or liability for the condition of any fire hydrant, or the pressure or amount of water obtainable therefrom, or any damages, either directly or indirectly resulting from the condition, pressure or quantity of water available at the hydrant. The public fire hydrants shall be used only for the purpose of extinguishing fire, except when the Village may issue a special permit for their use of contractors who shall then be responsible for the hydrants and the use of water from them. (Ord No. 1266; 10-15-07)

Directions:

Complete the following form and submit to the to the village administrator for review by the Village Board.

Re: Facility Number: 1630600  
FREEBURG – St. Clair County  
Evaluation Report – Noncompliance Advisory

Gentlemen:

An engineering evaluation of the Freeburg public water supply has been completed. A field inspection was made on May 12, 2010, by Fred Rosenblum of the Collinsville regional office. The Village was represented by John Tolan.

The Environmental Protection Agency periodically conducts these evaluations to determine if your community water supply meets the requirements of the Illinois Pollution Control Board's public water supply rules, regulations, and related standards. A list of deficiencies is outlined in Attachment A. Attachment B includes reminders and recommended improvements.

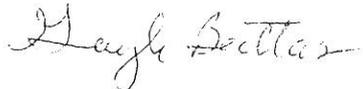

A written reply addressing all comments in Attachment A and Attachment B is required within thirty (30) days. A specific date must be included when each deficiency in Attachment A will be corrected.

This letter is a Noncompliance Advisory and is not a Violation Notice as specified in Section 31(a)(1) of the Act. If you do not adequately respond to the Noncompliance Advisory, the Illinois EPA may issue a formal violation notice according to Section 31(a)(1) of the Act.

FREEBURG – St. Clair County  
Facility Number: 1630600  
Page 2

We appreciate the cooperation and courtesy extended to us during this survey. If you have any questions regarding the evaluation, please contact the Collinsville Regional Office located at 2009 Mall Street, Collinsville, Illinois 62234, phone (618) 346-5120.

Sincerely,

Gayle Battas  
Collinsville Region Manager

## ATTACHMENT A

### SUMMARY OF DEFICIENCIES

The current evaluation of your community water supply indicates that the following conditions appear to violate Title IV of the Illinois Environmental Protection Act 415 ILCS 5/1-57.17 (1999) (The Act), 35 Illinois Administrative Code (35 IAC), the Recommended Standards for Water Works (1982) (Standards) and related standards.

#### **MANAGERIAL**

1. Take action to conduct cross-connection control surveys of the distribution system at least once every two years. [Section 18 of the Illinois Environmental Protection Act (Act) ILCS 5/18, 35 Ill. Adm. Code 607.104 and Part 653, Subpart H.]
2. Submit to this Agency an updated bacteriological sampling site plan for your facility. When the revised plan is approved, sampling site numbers will be assigned to each new approved sampling location. Thereafter, these site numbers must be used when reporting monthly bacteriological sample results. [Section 18 of the Act 415 ILCS 5/18, 35 Ill. Adm. Code 611.521.]
3. Properly complete the monthly operational reports your water supply submits to this Agency. In addition to the information which is already being submitted, these records are to consistently include the daily master meter readings and daily water usage, as well as the time of each daily master meter reading and chlorine residual reading. As a reminder, a copy of the reports must be submitted to this Agency within 30 days following the last day of the month. It is suggested that a copy of the reports be retained for the Village's files. [Section 19 of the Act 415 ILCS 5/19, 35 Ill. Adm. Code 611.831, and Section 18 of the Act 415 ILCS 5/18, 35 Ill. Adm. Code 653.604.]

Facility Number: 1630600  
Freeburg – St. Clair County

## ATTACHMENT B

### REMINDERS AND/OR RECOMMENDED IMPROVEMENTS

The following recommended improvements are intended to increase the Technical, Managerial and / or Financial Capacity of your water system:

#### **TECHNICAL**

4. Take action to have the East and West elevated storage tanks painted when necessary. Proper maintenance can increase the service life of the tanks.

---

## *Recommendations*

- The exterior coating system should be washed and an overcoat system applied within the next 3-5 years.
- The interior coating system should be spot repaired and maintained for another 5-8 years.
- New cable type safety climb should be added to each ladder.
- The roof ladder should be permanently attached.
- Install a new interior ladder.
- Install a riser handrail system.
- The cathodic protection handhole covers should be replaced.

## **Cost Estimates**

• Interior spot repairs	\$ 2,500
• Exterior overcoat	\$ 35,000
• Safety Climb	\$ 2,500
• Repairs	\$ 10,000

---

## *Recommendations*

- The exterior coating system should be removed within the next 2-3 years.
- The interior coating system should be spot repaired and maintained for another 5-8 years.
- The roof ladder should be permanently secured
- Install an interior ladder for safer access.
- Install a riser handrail system.
- A new freeze-proof and insect-proof vent should be installed.
- Replace handhole covers from previous cathodic protection.
- Install new pressure manway.

## **Cost Estimates**

- |                             |            |
|-----------------------------|------------|
| • Interior coating repairs  | \$ 2,500   |
| • Exterior coating replaced | \$ 125,000 |
| • Repairs                   | \$ 13,000  |
